Integration of IoT Devices into Asset Management **Platform of Mappazzo Limited**

ARJUN MADHAVANKUTTY

REALTIME DATA

Connect your sensors to view realtime status and history of your assets and processes

Sensor readings and custom triggers integrate seamlessly with your maps and asset records to provide alerts and visual queues.

- · Track mobile assets with GPS
- Connect your existing IoT devices via industry standard protocols

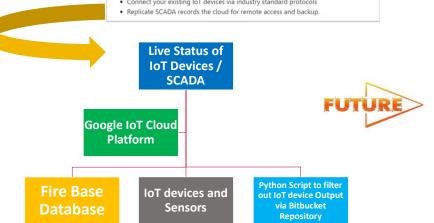

IMAGE LINKING allows teams to go beyond 2-dimensional mapping of assets. It is now possible to provide clear communication about complex systems, and to identify component assets easily and efficently.

With a few clicks you can create visual links in and between your spatial maps, asset records and images.
