New Zealand Working Holiday App

Making a Hybrid app using

Vue, Ionic and Airtable

Background
- Backpackers will return to NZ
- Auszeit NZ competes in a crowded market
- Service & information is key
- Multi-lingual is futureproof

Vue
- Frontend JavaScript framework
- Focus on logic
- Integrates well with Ionic
- Easy to worth with

Ionic
- Frontend JavaScript framework
- Focuses on UI components for mobile
- Integrates well with Vue
- A single codebase across various platforms

Airtable
- Complete back end software
- Spreadsheet like database
- Ease of use for everyone

Result
- Capacitor is used for deployment
- Runs equally on iOS and Android
- Optimized for the Ionic Framework
- Easily deployed to the app stores
- Native functionality
- App-Builder instead of App

Capacitor

Overview
